The Solomon Islands are a dive traveler's dream. An underdeveloped, uncrowded and very beautiful country located right in the middle of the world's centre for marine bio-diversity.

Uepi Island Resort

Remote and stunningly beautiful, Uepi is for those who really want to get away from it all.

Dive sites along The Uepi Island Passage are exclusively coral reef ecosystem. The diving is varied with over 10 main dive sites of differing structure and bioassemblage; including shallow (approx. 12m) and deep coral gardens with magnificent drop-offs, ledges and gutters featuring an enormous diversity of reef fish.

Turtles, sharks, mantas and eagle rays are fairly common sights, as well as the (friendly) Uepi hammerheads in season.
